## **IL – ASCE Scholarship Notice for High School Juniors**

### **INTRODUCTION TO ENGINEERING PROGRAM UNIVERSITY OF NOTRE DAME**

**Session 1: June 20 - July 8, 2010**

**Session 2: July 11 - July 29, 2010**

The Illinois Section of the American Society of Civil Engineers (IL-ASCE) is seeking applications from minority students interested in participating in a three-week summer Introduction to Engineering Program at the University of Notre Dame. The program is designed to provide high school students with a broad exposure to the profession of engineering and to motivate those who possess an interest in pursuing a career in this challenging field. During the three-week program at the University of Notre Dame campus (located near South Bend, Indiana), participants will attend lectures and participate in hands-on laboratory exercises related to the various fields of engineering analysis and design, computer programming, and other special topics. In addition, students will gain the experience of living in a university environment for a three-week period.

Applicants must be completing their Junior year in high school and have completed (by the end of the school year) three years of high school level mathematics and one year of science (either chemistry or physics) courses.

As part of its ongoing commitment to encouraging minority students to consider engineering as a career, the IL-ASCE will be providing a limited number of full scholarships (tuition, room and board, and transportation) for this program. The IL-ASCE will cover the cost of the program, including room and board and transportation expenses for those students selected. Application deadline is **March 31, 2010.**
