- Cost:** \$30 – General  
\$20 – Government  
\$10 – Students
- Registration:** [123SignUp](#) by April 30<sup>th</sup>
- Questions:** Contact Tina Revzin ([tlrevzin@transystems.com](mailto:tlrevzin@transystems.com))
- Additional Details:** 1.0 PDH will be awarded to all attendees;  
YMG Punch Card eligible event

#### Abstract:

The seminar will provide an overview of legal issues that have an impact upon Civil/Structural Engineering, including a brief background of the statutory, contractual and common law requirements placed upon the practice of engineering. In addition, various responsibilities in an engineer's everyday practice including, means and methods, shop drawings, design delegation and standard of care will be explored from a legal perspective. Several actual case studies where key engineering issues were highlighted by courts and administrative bodies will be reviewed. The seminar will conclude with a discussion of the involvement of engineers in the legal process as experts, dispute review board members and arbitrators.

#### Speaker Bio:

Justin Weisberg is a partner focusing on construction law and commercial litigation. Mr. Weisberg represents private, public, local, and international clients in a variety of construction-related transactions and litigation matters. Mr. Weisberg has a background in professional engineering, giving him added insight and understanding into his client's cases. His legal experience has included contract negotiation and drafting of design, design build, IPD, P3 and construction contracts as well as mediation, arbitration and litigation including both bench and jury trials of numerous disputes involving design, construction and insurance coverage matters. His prior work as a registered professional engineer in both Illinois and Florida allows him to utilize his previous engineering experience in his law practice to provide ongoing project counseling to clients. Mr. Weisberg has been an ASCE delegate on EJCDC for 14 years and he is a past chair of EJCDC, and was the chair of the Task Force that developed the EJCDC P3 Contract Form. He is also Construction Section Counsel to the ISBA a member of the ABA Construction Forum, a member of the Illinois Society of Construction Attorneys and a member of the NCDRC Executive Committee. He has experience involving numerous projects including office, commercial, and residential buildings; nuclear and coal fired power plants; manufacturing facilities, laboratories, water distribution systems, waste water treatment facilities, schools, libraries, stadiums, exposition centers, governmental facilities, roads, bridges, transit stations, refineries, solar energy facilities, LNG facilities, ethanol plants and single family residences.
